

Task 2 – JavaScript Mini Project (To-Do List App)

Student Details

- **Name:** Kanuri Siri
- **Domain:** Frontend Development
- **Internship:** InternSpark

Objective

To develop an interactive and responsive To-Do List application using JavaScript and DOM manipulation.

Technologies Used

- HTML5
- CSS3
- JavaScript
- DOM Manipulation
- GitHub

Project Features

- ✓ Add New Tasks
- ✓ Mark Tasks as Completed
- ✓ Delete Tasks
- ✓ Responsive Design
- ✓ Interactive User Interface
- ✓ Background Image UI
- ✓ Modern Glass morphism Design
- ✓ DOM Manipulation using JavaScript

Project Description

The To-Do List application allows users to add daily tasks, mark them as completed, and remove them when finished. The project demonstrates JavaScript DOM manipulation, event handling, responsive design, and modern frontend styling techniques.

Sample Code Snippets

Add Task Function

```
function addTask() {  
  
    let taskInput = document.getElementById("taskInput");  
  
    let taskText = taskInput.value.trim();  
  
    if (taskText === "") {  
        alert ("Please enter a task");  
        return;  
    }  
}
```

Toggle Completed Task

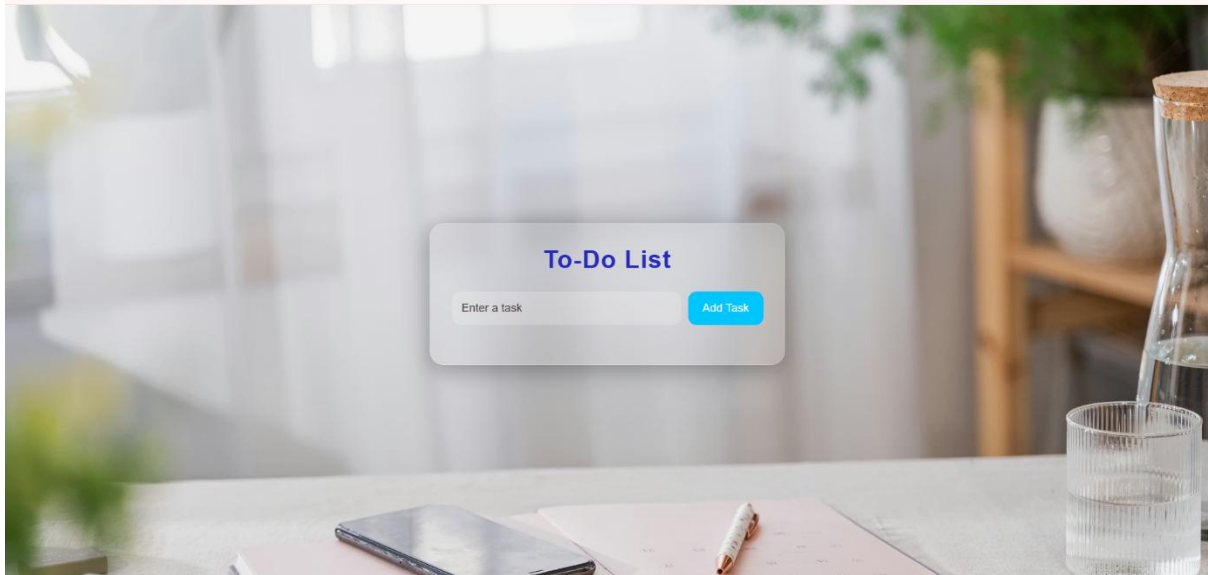

```
taskText.classList.toggle("completed");
```

Responsive Background CSS

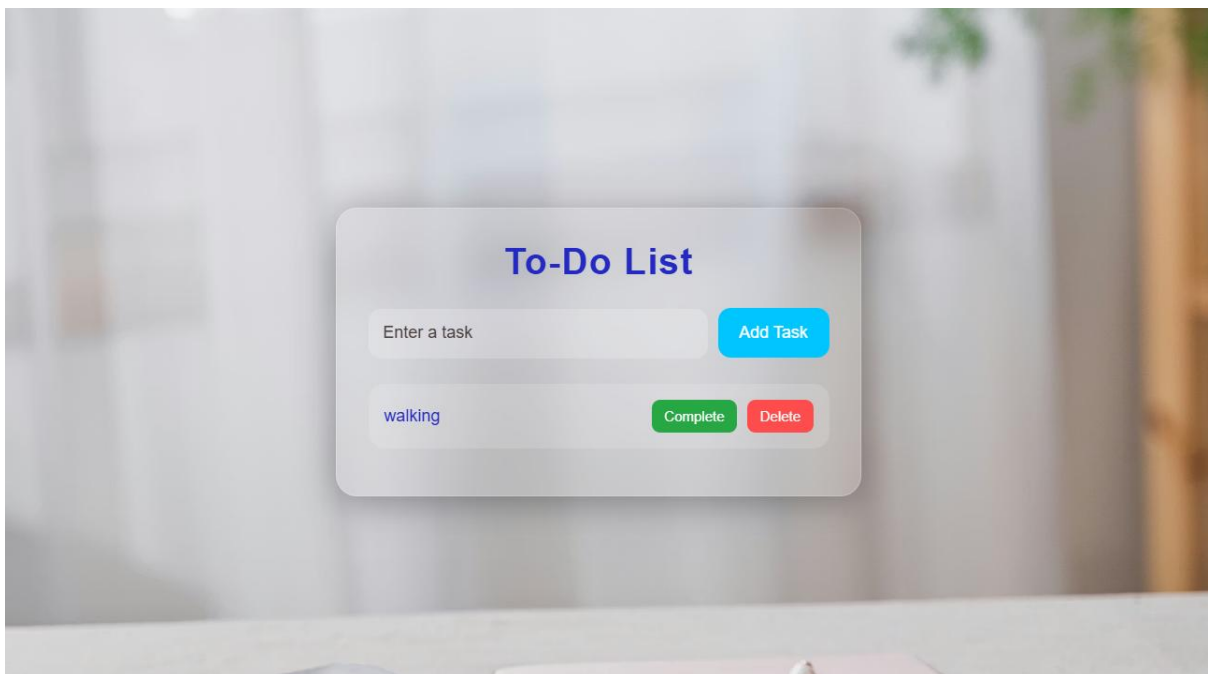

```
background:url('todo.avif') no-repeat center center/cover;
```

Screenshots

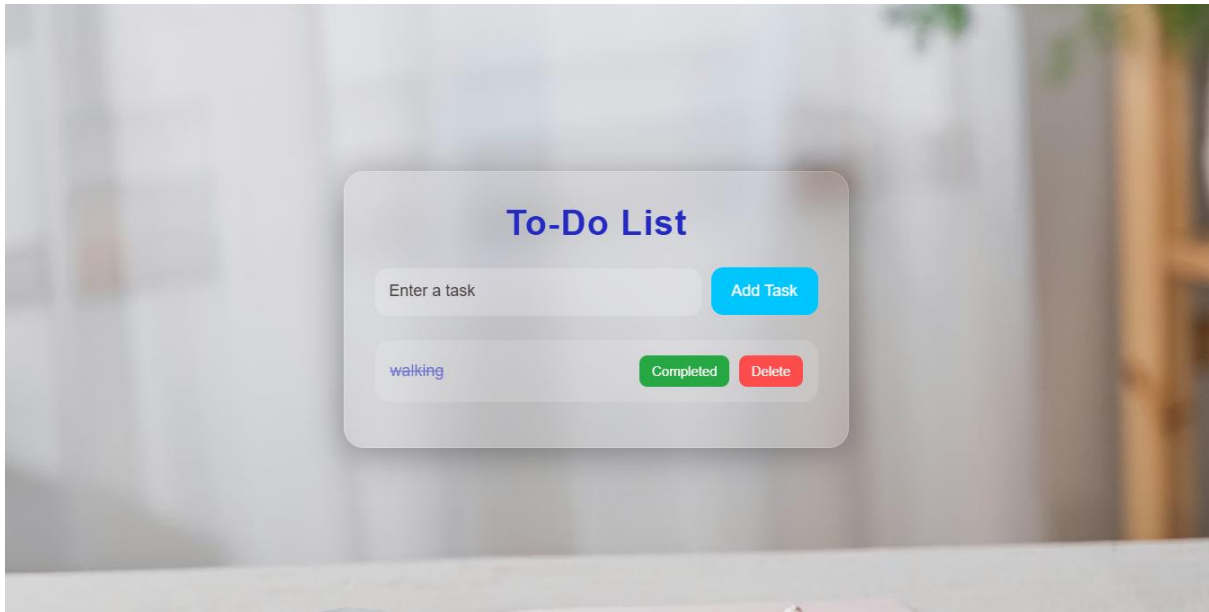

1. Home UI

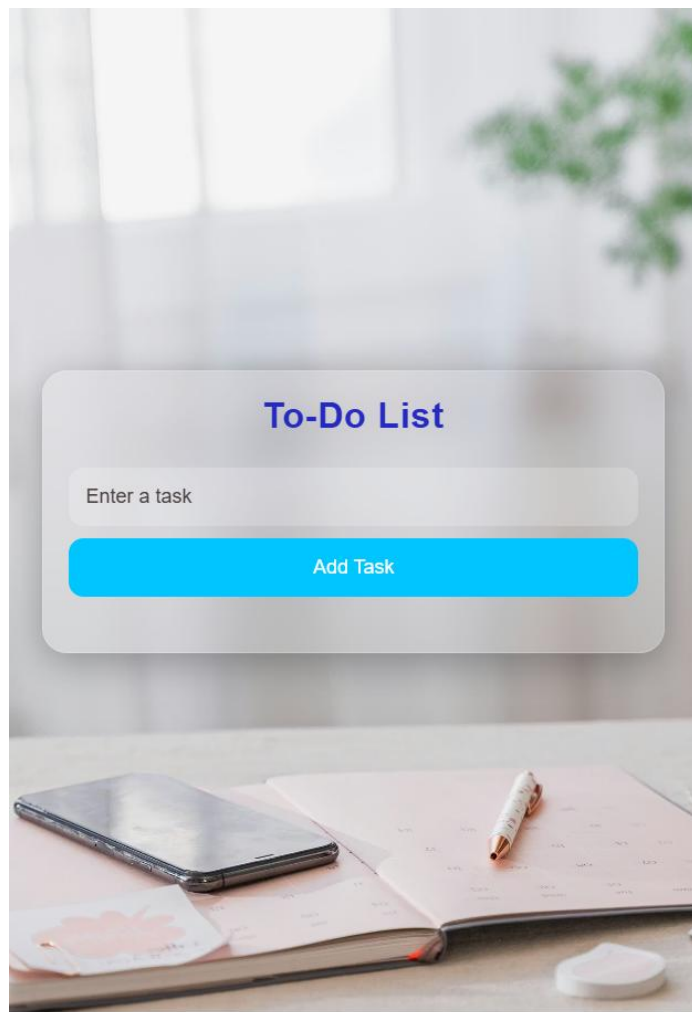

2. Added Tasks

3. Completed Tasks

4. Mobile Responsive View

Conclusion

This project helped me understand JavaScript DOM manipulation, event handling, responsive web design, and frontend development concepts. I learned how to build an interactive mini application with modern UI styling and deploy it using GitHub Pages.
